

## Anti-PARK7 antibody (1-189) (STJ11100527)

STJ11100527

### GENERAL INFORMATION

|                          |                       |
|--------------------------|-----------------------|
| <b>Product Type</b>      | Primary antibodies    |
| <b>Short Description</b> |                       |
| <b>Applications</b>      | WB/IHC-P/IF/ICC/ELISA |
| <b>Host/Source</b>       | Rabbit                |
| <b>Reactivity</b>        | Human/Mouse/Rat       |

### PRODUCT PROPERTIES

|                      |                                                                                                                                                                                 |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clonality</b>     | Polyclonal                                                                                                                                                                      |
| <b>Clone ID</b>      |                                                                                                                                                                                 |
| <b>Concentration</b> | Lot specific                                                                                                                                                                    |
| <b>Conjugation</b>   | Unconjugated                                                                                                                                                                    |
| <b>Purification</b>  | Affinity purification                                                                                                                                                           |
| <b>Dilution</b>      | WB:1:500-1:1000                                                                                                                                                                 |
| <b>Range</b>         | IHC-P:1:50-1:200<br>IF/ICC:1:50-1:200<br>ELISA:Recommended starting concentration is 1 $\mu$ g/mL. Please optimize the concentration based on your specific assay requirements. |
| <b>Formulation</b>   | PBS with 0.05% Proclin300, 50% Glycerol, pH 7.3.                                                                                                                                |
| <b>Isotype</b>       | IgG                                                                                                                                                                             |
| <b>Storage</b>       | Store at -20°C for up to 1 year from the date of receipt, and avoid repeat freeze-thaw cycles.                                                                                  |
| <b>Instruction</b>   |                                                                                                                                                                                 |

### TARGET INFORMATION

|                           |                                                                                                                                                                                                           |

Immunofluorescence analysis of L929 cells using DJ-1/PARK7 Rabbit polyclonal antibody (STJ11100527) at dilution of 1:100 (40x lens). Blue: DAPI for nuclear staining.

Immunofluorescence analysis of HeLa cells using DJ-1/PARK7 Rabbit polyclonal antibody (STJ11100527) at dilution of 1:100 (40x lens). Blue: DAPI for nuclear staining.

Immunofluorescence analysis of C6 cells using DJ-1/PARK7 Rabbit polyclonal antibody (STJ11100527) at dilution of 1:100 (40x lens). Blue: DAPI for nuclear staining.

Immunohistochemistry analysis of paraffin-embedded human esophageal tissue using DJ-1/PARK7 Rabbit polyclonal antibody (STJ11100527) at dilution of 1:100 (40x lens). Perform microwave antigen retrieval with 10 mM PBS buffer pH 7.2 before commencing with immunohistochemistry staining protocol.

This product is suitable for in-vitro studies under the RESEARCH USE ONLY [RUO] licence. This product must not be used as for diagnostic or other medical purposes.
