

## Anti-CD226 antibody (19-336) (STJ115360)

STJ115360

### GENERAL INFORMATION

|                          |                    |
|--------------------------|--------------------|
| <b>Product Type</b>      | Primary antibodies |
| <b>Short Description</b> |                    |
| <b>Applications</b>      | WB/ELISA           |
| <b>Host/Source</b>       | Rabbit             |
| <b>Reactivity</b>        | Human              |

### PRODUCT PROPERTIES

|                      |                                                                                                                                    |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clonality</b>     | Polyclonal                                                                                                                         |
| <b>Clone ID</b>      |                                                                                                                                    |
| <b>Concentration</b> | Lot specific                                                                                                                       |
| <b>Conjugation</b>   | Unconjugated                                                                                                                       |
| <b>Purification</b>  | Affinity purification                                                                                                              |
| <b>Dilution</b>      | WB: 1:500-1:2000                                                                                                                   |
| <b>Range</b>         | ELISA: Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements. |
| <b>Formulation</b>   | PBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.3.                                                                                 |
| <b>Isotype</b>       | IgG                                                                                                                                |
| <b>Storage</b>       | Store at -20°C for up to 1 year from the date of receipt, and avoid repeat freeze-thaw cycles.                                     |
| <b>Instruction</b>   |                                                                                                                                    |

### TARGET INFORMATION

|                           |                                                                                                                                                                                                                                                                                                                                                                                    |

Western blot analysis of extracts of various cell lines, using CD226 antibody (STJ115360) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-rabbit IgG (H+L) at 1:10000 dilution. Lysates/proteins: 25 µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit. Exposure time: 10s.

This product is suitable for in-vitro studies under the RESEARCH USE ONLY [RUO] licence. This product must not be used as for diagnostic or other medical purposes.
