

Anti-Human IgA Secretory Component antibody [SC-05] (STJ16101011) STJ16101011

GENERAL INFORMATION

 Product Type
 Primary antibodies

 Shot
 Mouse monoclonal antibody anti-Human IgA Secretory Component is suitable for use in ELISA, Flow Cytometry, Western Blot, Immunohistochemistry and Immunoprecipitation research applications.

 Applications
 ELISA/FC/WB/IHC/IP

 Mouse
 Mouse

 Reactivity
 Human/Rat

PRODUCT PROPERTIES

 Clonality
 Monoclonal

 Clone ID
 SC-05

 Concentration
 Can be provided as 100 µg/mL, 500 µg/mL or 1mg/mL.

 Conjugation
 Unconjugated

 Purification
 Affinity purified from tissue culture.

 Dilution
 ELSA (solid phase: 0, 1-100 µg/ml; tracer: 0, 001-100 µg/ml for 30 min at RT). Flow cytometry (0.5-1.0 µg/million cells in 0.1 ml).

 Rame
 PBS with 0.02% Sodium Azide.

 Isotype
 IgG1k

 Storage
 Storage to rup to 1 year at 2-8°C upon receipt.

TARGET INFORMATION

 Gene ID
 5284

 Gene Symbol
 PIGR

 Uniprot ID
 PIGR_HUMAN

 Immunogen
 A BALB/c mouse was immunized with affinity purified human secretory component. Fusion partner: P3-X63-Ag8.653.

 Immunogen
 Region

 Specificity
 Immunogen
