Immunogen	The antiserum was produced against synthesized peptide derived from the human Trk A around the phosphorylation site of Tyr791 at the amino acid range 747-796
Immunogen Region	747-796 aa
Specificity	Phospho-Trk A (Y791) Polyclonal Antibody detects endogenous levels of Trk A protein only when phosphorylated at Y791.
Immunogen Sequence	

Immunohistochemistry analysis of paraffin-embedded human brain, using Trk A (Phospho-Tyr791) Antibody. The picture on the right is blocked with the phospho peptide.

Immunohistochemical analysis of paraffin-embedded Human breast cancer. Antibody was diluted at 1:100 (4A°C overnight). High-pressure and temperature Tris-EDTA, pH8.0 was used for antigen retrieval. Negative control (right) obtained from antibody was pre-absorbed by immunogen peptide.
