

### Human URAT1 (Urate Transporter 1) Sandwich ELISA Kit Kit (STJE0012948) STJE0012948

## **GENERAL INFORMATION**

#### Product Type Kits

Applications ELISA Reactivity Human

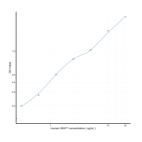

Short This URAT1 Sandwich ELISA Kit is an in-vitro enzyme-linked immunosorbent assay for the measurement of samples in human tissue Description homogenates or other biological fluids..

## **PRODUCT PROPERTIES**

| Detection<br>Sensitivity | 0.312-20ng/mL<br>0.127ng/mL                                                                                                         |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
|                          | 0.312-20ng/mL                                                                                                                       |
| Limit                    |                                                                                                                                     |
| Assay Time               | 4.5 hrs                                                                                                                             |
|                          | Store the unopened kit in the fridge at 2-8°C for up to 6 months. Once opened store individual kit contents according to components |
| Instruction              | table provided with the kit.                                                                                                        |
| Note                     | STRICTLY FOR FURTHER SCIENTIFIC RESEARCH USE ONLY (RUO). MUST NOT TO BE USED IN DIAGNOSTIC OR THERAPEUTIC                           |
|                          | APPLICATIONS.                                                                                                                       |
|                          | APPLICATIONS.                                                                                                                       |

# TARGET INFORMATION

This product is suitable for in-vitro studies under the RESEARCH USE ONLY [RUO] licence. This product must not be used as for diagnostic or other medical purposes. St John's Laboratory Ltd, Knowledge Dock Business Centre, University Way, London, E16 2RD | Tel: 0208 223 3081
