

## Human KYNU (Kynureninase) Sandwich ELISA Kit Ready-To-Use Kit (STJE0016627)

STJE0016627

### GENERAL INFORMATION

|                          |                                                                                                                                                                                                   |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Type</b>      | Kits                                                                                                                                                                                              |
| <b>Short Description</b> | This KYNU Sandwich ELISA Kit, Ready-To-Use is an in-vitro enzyme-linked immunosorbent assay for the measurement of samples in human tissue homogenates, cell lysates or other biological fluids.. |
| <b>Applications</b>      | ELISA                                                                                                                                                                                             |
| <b>Reactivity</b>        | Human                                                                                                                                                                                             |

### PRODUCT PROPERTIES

|                        |                                                                                                                                                                                                                                                |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Detection</b>       | 0.156-10ng/mL                                                                                                                                                                                                                                  |
| <b>Sensitivity</b>     | 0.057ng/mL                                                                                                                                                                                                                                     |
| <b>Detection Limit</b> | 0.156-10ng/mL                                                                                                                                                                                                                                  |
| <b>Assay Time</b>      | 3 hrs                                                                                                                                                                                                                                          |
| <b>Storage</b>         | The whole kit may be stored at -20°C for up to 12 months from receipt. An unopened kit may be stored in the fridge at 2-8°C for up to 6 months. Once opened store individual kit contents according to components table provided with the kit. |
| <b>Instruction</b>     |                                                                                                                                                                                                                                                |
| <b>Note</b>            | STRICTLY FOR FURTHER SCIENTIFIC RESEARCH USE ONLY (RUO). MUST NOT TO BE USED IN DIAGNOSTIC OR THERAPEUTIC APPLICATIONS.                                                                                                                        |

### TARGET INFORMATION

|                     |                                                              |
