

## Anti-Citrullinated Fibrinogen Immunoglobulin antibody [20B2] (STJ16100951)

STJ16100951

### GENERAL INFORMATION

|                          |                                                                                                                                                                   |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Type</b>      | Primary antibodies                                                                                                                                                |
| <b>Short Description</b> | Mouse monoclonal antibody anti-Citrullinated Fibrinogen Immunoglobulin is suitable for use in Immunohistochemistry, Western Blot and ELISA research applications. |
| <b>Applications</b>      | IHC, WB, ELISA                                                                                                                                                    |
| <b>Host/Source</b>       | Mouse                                                                                                                                                             |
| <b>Reactivity</b>        | Mouse, Human                                                                                                                                                      |

### PRODUCT PROPERTIES

|                            |                                                                                 |
|----------------------------|---------------------------------------------------------------------------------|
| <b>Clonality</b>           | Monoclonal                                                                      |
| <b>Clone ID</b>            | 20B2                                                                            |
| <b>Concentration</b>       |                                                                                 |
| <b>Conjugation</b>         | Unconjugated                                                                    |
| <b>Purification</b>        |                                                                                 |
| <b>Dilution Range</b>      | ELISA 1:2000-1:4000<br>IHC 1:100-1:500<br>WB 1:200-1:1000                       |
| <b>Formulation</b>         | lyophilized in a 10 mM ammonium bicarbonate buffer. Each vial contains 2 mg BSA |
| <b>Isotype</b>             | IgG1                                                                            |
| <b>Storage Instruction</b> | Store at 2-8°C upon receipt.                                                    |
