

## Anti-NONO/p54NRB, biotinylated antibody (C-Term) {Biotin} (STJ73477)

STJ73477

### GENERAL INFORMATION

|                          |                                                                                                                                                                             |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Type</b>      | Primary antibodies                                                                                                                                                          |
| <b>Short Description</b> | Goat polyclonal antibody anti-NONO/p54NRB, biotinylated (C-Term) is suitable for use in ELISA, Western Blot, Immunohistochemistry and Flow Cytometry research applications. |
| <b>Applications</b>      | Pep-ELISA, WB, IHC, FC                                                                                                                                                      |
| <b>Host/Source</b>       | Goat                                                                                                                                                                        |
| <b>Reactivity</b>        | Human, Mouse, Rat, Dog                                                                                                                                                      |

### PRODUCT PROPERTIES

|                       |                                                                                                                                       |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>Clonality</b>      | Polyclonal                                                                                                                            |
| <b>Clone ID</b>       |                                                                                                                                       |
| <b>Concentration</b>  | 0.5 mg/mL                                                                                                                             |
| <b>Conjugation</b>    | Biotin                                                                                                                                |
| <b>Purification</b>   | Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide. |
| <b>Dilution Range</b> | ELISA-antibody detection limit dilution 1:16000.                                                                                      |
| <b>Formulation</b>    | 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin. NA                                                |
| <b>Isotype</b>        | IgG                                                                                                                                   |
| <b>Storage</b>        | Store at -20 on receipt and minimise freeze-thaw cycles.                                                                              |
| <b>Instruction</b>    |                                                                                                                                       |

### TARGET INFORMATION

|                           |                |
|---------------------------|----------------|
| <b>Gene ID</b>            | 4841           |
| <b>Gene Symbol</b>        | NONO           |
| <b>Uniprot ID</b>         | NONO_HUMAN     |
| <b>Immunogen</b>          |                |
| <b>Immunogen Region</b>   | C-Term         |
| <b>Specificity</b>        |                |
| <b>Immunogen Sequence</b> | NRAAPGAEFAPNK. |

Biotinylated STJ70921 (0.1 µg/ml) staining of Mouse Brain lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence, using streptavidin-HRP and using NAP blocker as a substitute for skimmed milk.

This product is suitable for in-vitro studies under the RESEARCH USE ONLY [RUO] licence. This product must not be used as for diagnostic or other medical purposes.
