

## Human FGF1 (Fibroblast growth factor 1) Sandwich ELISA Kit (STJE0001966)

STJE0001966

### GENERAL INFORMATION

|                          |                                                                                                                                                                                            |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Type</b>      | Kits                                                                                                                                                                                       |
| <b>Short Description</b> | This FGF1 Sandwich ELISA Kit is an in-vitro enzyme-linked immunosorbent assay for the measurement of samples in human cell culture supernatant, serum and plasma (EDTA, citrate, heparin). |
| <b>Applications</b>      | ELISA                                                                                                                                                                                      |
| <b>Reactivity</b>        | Human                                                                                                                                                                                      |

### PRODUCT PROPERTIES

|                        |                                                                                                                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Detection</b>       | Colometric                                                                                                                                                                                  |
| <b>Sensitivity</b>     | 18.75pg/mL                                                                                                                                                                                  |
| <b>Detection Limit</b> | 31.25~2000pg/mL                                                                                                                                                                             |
| <b>Assay Time</b>      | 3.5h                                                                                                                                                                                        |
| <b>Storage</b>         | If unopened the kit may be stored at 2-8 °C for up to 1 month. If the kit will not be used within 1 month, store the components separately, according to the component table in the manual. |
| <b>Instruction</b>     |                                                                                                                                                                                             |
| <b>Note</b>            | FOR RESEARCH USE ONLY (RUO).                                                                                                                                                                |

### TARGET INFORMATION

|                     |                                           |
|---------------------|-------------------------------------------|
| <b>Sample Types</b> | Serum, plasma and other biological fluids |
| <b>Gene</b>         | FGF1                                      |
| <b>Symbol</b>       |                                           |
| <b>Uniprot ID</b>   | FGF1_HUMAN                                |

This product is suitable for in-vitro studies under the RESEARCH USE ONLY [RUO] licence. This product must not be used as for diagnostic or other medical purposes.
