

## Mouse NEP (Nepriylsin) Sandwich ELISA Kit Ready-To-Use (STJE0017304)

STJE0017304

### GENERAL INFORMATION

|                          |                                                                                                                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Type</b>      | Kits                                                                                                                                                                                                    |
| <b>Short Description</b> | This NEP Sandwich ELISA Kit, Ready-To-Use is an in-vitro enzyme-linked immunosorbent assay for the measurement of samples in mouse cell culture supernatant, serum and plasma (EDTA, citrate, heparin). |
| <b>Applications</b>      | ELISA                                                                                                                                                                                                   |
| <b>Reactivity</b>        | Mouse                                                                                                                                                                                                   |

### PRODUCT PROPERTIES

|                        |                                                                                                                                                                                                                                                |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Detection</b>       | 78.1-5000pg/mL                                                                                                                                                                                                                                 |
| <b>Sensitivity</b>     | 33pg/mL                                                                                                                                                                                                                                        |
| <b>Detection Limit</b> | 78.1-5000pg/mL                                                                                                                                                                                                                                 |
| <b>Assay Time</b>      | 3 hrs                                                                                                                                                                                                                                          |
| <b>Storage</b>         | The whole kit may be stored at -20°C for up to 16 months from receipt. An unopened kit may be stored in the fridge at 2-8°C for up to 6 months. Once opened store individual kit contents according to components table provided with the kit. |
| <b>Note</b>            | FOR RESEARCH USE ONLY (RUO).                                                                                                                                                                                                                   |

### TARGET INFORMATION

|                     |                                           |
|---------------------|-------------------------------------------|
| <b>Sample Types</b> | serum, plasma or other biological fluids. |
