

## Anti-Recombinant-chimeric-CD131-Nb-Fc antibody (STJA0038521)

### GENERAL INFORMATION

|               |                    |
|---------------|--------------------|
| Product Type  | Primary antibodies |
| Applications  | FC/ELISA           |
| Host / Source | 293F Cells         |
| Reactivity    | Human              |

### PRODUCT PROPERTIES

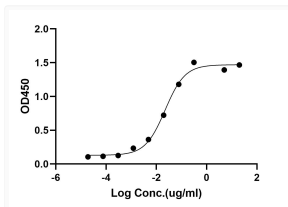

|                     |                                                                                               |
|---------------------|-----------------------------------------------------------------------------------------------|
| Clonality           | Monoclonal                                                                                    |
| Concentration       | Lot specific                                                                                  |
| Conjugation         | Unconjugated                                                                                  |
| Purification        | Recombinant Expression and Affinity purified                                                  |
| Dilution Range      | ELISA 1:5000-100000<br>FC 1-2 Mu g/Test                                                       |
| Formulation         | Phosphate-buffered solution                                                                   |
| Storage Instruction | Store at-20°C for up to 1 year from the date of receipt, and avoid repeat freeze-thaw cycles. |

### TARGET INFORMATION

|             |                                                                                      |
|-------------|--------------------------------------------------------------------------------------|
| Specificity | This recombinant monoclonal antibody can detects endogenous levels of CD325 protein. |
|-------------|--------------------------------------------------------------------------------------|

### ADDITIONAL INFORMATION

Note STRICTLY FOR FURTHER SCIENTIFIC RESEARCH USE ONLY (RUO). MUST NOT TO BE USED IN DIAGNOSTIC OR THERAPEUTIC APPLICATIONS.
