

## Human IL-20RA protein (Recombinant) (STJP000704)

### GENERAL INFORMATION

|               |          |
|---------------|----------|
| Product Type  | Proteins |
| Host / Source | HEK293   |

### PRODUCT PROPERTIES

|                     |                                                                                                                                                                                                     |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Formulation         | Lyophilised 0.2 Mu m filtered PBS solution, pH7.2.                                                                                                                                                  |
| Molecular Weight    | Recombinant Human IL-20RA is a monomer protein consisting of 232 amino acid residue subunits, due to glycosylation migrates as an approximately 45kD protein under reducing SDS-PAGE conditions. NA |
| Storage Instruction | Can be stored in working aliquots at 2°C-8°C C for one month, or at -20°C to -70°C for 1 year. Avoid repeated freeze/thaw cycles. NA                                                                |

### TARGET INFORMATION

|                  |                             |
|------------------|-----------------------------|
| Gene ID          | <a href="#">53832</a>       |
| Gene Symbol      | <a href="#">IL20RA</a>      |
| UniProt ID       | <a href="#">I20RA_HUMAN</a> |
| Immunogen Region | ECD                         |

### ADDITIONAL INFORMATION

|      |                                                                                                              |
