

## Goat Anti-Rat IgG H+L antibody {Unconjugated} (STJS001257)

### GENERAL INFORMATION

|               |                      |
|---------------|----------------------|
| Product Type  | Secondary antibodies |
| Applications  | WB                   |
| Host / Source | Goat                 |
| Reactivity    | Rat                  |

### PRODUCT PROPERTIES

|                     |                                                                                                                                |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Clonality           | Polyclonal                                                                                                                     |
| Conjugation         | Unconjugated                                                                                                                   |
| Purification        | Affinity purification                                                                                                          |
| Dilution Range      | WB, 1:500-1:1000                                                                                                               |
| Formulation         | PBS containing 50% glycerol, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis) , pH 7.3. |
| Isotype             | IgG                                                                                                                            |
| Storage Instruction | Store at-20°C for up to 1 year from the date of receipt, and avoid repeat freeze-thaw cycles.                                  |

### TARGET INFORMATION

|                    |     |
|--------------------|-----|
| Immunogen Sequence | Rat |
|--------------------|-----|

### ADDITIONAL INFORMATION

|      |                                                                                                                         |
